

Research and Development Coordinator

The Aquaculture Association of Nova Scotia is a membership based organization representing aquaculture producers throughout the province.

Position:

The AANS is seeking a dynamic individual to fill the role of Research and Development Coordinator. The position is a one year term appointment subject to funding renewal. Reporting to the Executive Director and under the advisement of the R&D Committee of the Board of Directors, the successful candidate will be responsible for acting as the AANS liaison with industry and other stakeholders on issues related to research and development. Establishing linkages with industry representatives, researchers and funding partners both provincially and Atlantic wide will be essential.

The ideal candidate will be knowledgeable in research and development initiatives and issues related to commercially cultured species as well as those under development within the province. A demonstrated ability to identify industrial research opportunities, develop projects, secure funding and manage multiple projects is essential.

Qualifications:

A university degree in the sciences with post graduate education in aquaculture with previous research and commercial experience in the industry are required. The candidate must possess strong interpersonal and communications skills and a demonstrated ability to work both independently and as a team member.

Salary:

Commensurate with qualifications and experience.

Interested applicants may forward their curriculum vitae by **February 28, 2008** to:

Selection Committee,
The Aquaculture Association of Nova Scotia,
7075 Bayers Road, Suite 215,
Halifax, Nova Scotia,
B3L 2C2
